Quality Requirements:

R1 - Security + Availability + Scalability

R1.1 - Security + Usability

R1.2 - Security + Performance

R2 - Availability + Usability

R2.1 - Usability + security

R2.2 - Usability

R2.3 - Scalability + performance

R2.4 - Maintainability

R2.5 Security + usability + scalability + maintainability

Functional Requirements of ClickUP:

R1: Provide a safe and secure platform for students and lecturers to use.

R1.1: Differentiate user access level depending on the type of user you are by providing a secured login process. For example, a lecturer has different access rights compared to a student

R1.2 : Secure validation process of user information is required for clickUP to function

R2 : Provide a UI that allows students and lecturers to access particular modules individually

R2.1 : Lecturers can customise their module page by adding or removing different subpages of the module

R2.2 : Have an activity stream to show the students what are the due dates for assignments or tests

R2.3 : Have the ability for lecturers to add specifications, tests and for students to view those specifications, test and to submit their assignments to their designated locations.

R2.4 : Have the ability for the lecturer to see all the students who are

taking his module, the marks that the students have.

R2.5 : Have the ability for the students to view their marks.
